SUMMARY REPORT
FT 930-I

September 1965

FOR RELEASE
November 9, 1965

IMPORT TRADE BY COMMODITY

The Bureau of the Census, Department of Commerce, announced today that the increase in U.S. general imports of merchandise from $1,717.6 million in August to $1,797.5 million in September,[1,2] a gain of about 5 percent, reflected increases in imports of all but one of the ten Schedule A commodity sections. The bulk of the increase was accounted for, however, by higher levels of imports of 4 of the 10 commodity sections, food and live animals, machinery and transport equipment, miscellaneous manufactured articles, and beverages and tobacco.

Imports of food and live animals rose from $271.6 to $304.1 million reflecting increases in imports of cattle, from $6.6 to $10.1 million; fruits, nuts and vegetables, except oil nuts, from $26.1 to $34.0 million; coffee, from $77.4 to $83.5 million;[2] and sugar, from $42.7 to $48.9 million.[2] Imports of machinery and transport equipment increased from $214.9 to $236.0 million largely due to increases in imports of passenger cars, from $23.1 to $53.8 million and motorcycles and parts, from $14.8 to $17.8 million which were partly offset by a drop in imports of civilian and military aircraft and parts, from $14.8 to $6.0 million. Increases in imports of clothing, excluding footwear, from $55.0 to $57.2 million; watches, clocks and parts, from $7.6 to $9.9 million; and toys, sporting goods and amusement equipment, from $14.9 to $17.1 million, were the chief factors in the advance in imports of miscellaneous manufactured articles, from $171.0 to $183.6 million. The increase in imports of beverages and tobacco, from $36.3 to $43.6 million was accounted for by a rise in imports of whiskey and other distilled spirits, from $25.2 to $34.3 million.

Although the over-all increase in imports of manufactured goods classified chiefly by material was small, from $454.4 million in August to $456.1 million in September, some counterbalancing changes were noted in imports of some of the individual commodities included in this section. The more notable of these changes were increases in imports of gem diamonds, from $17.3 to $23.2 million; standard newsprint paper, from $65.1 to $70.5 million; copper and alloys, from $28.7 to $33.9 million; tin and alloys, from $8.8 to $17.2 million, and a decrease in imports of iron and steel mill products, from $112.4 to $86.4 million. The level of imports of mineral fuels, lubricants and related materials also showed little change between August and September, $176.6 to $177.1 million as increases in imports of crude petroleum, from $98.1 to $105.6 million and fuel oil, from $46.0 to $49.0 million were partly offset by a drop in imports of natural and manufactured gas, from $14.6 to $9.2 million.

During the period, imports of inedible crude materials, except fuels, fell from $266.3 to $252.7 million as decreases were reported in imports of iron ore and concentrates, from $51.4 to $38.3 million; and lumber from $37.2 to $33.0 million. However, imports of crude rubber, also included in this section, rose from $11.5 to $15.9 million.

[1] On a seasonally adjusted basis, total general imports were valued at $1,786.8 million in September as compared to $1,725.4 million in August. (See the September 1965 issue of Report FT 900-1.)

[2] Information received after the original release of the September total indicates that some entries for merchandise unladen by the end of September had not been received at Census in time for inclusion in the September statistics. Receipt was delayed because of a processing backlog at certain ports resulting from peak unloadings at the end of the maritime strike late in August. Entries accounting for a least twenty-five million dollars of coffee imports (71 million pounds) which would normally have been recorded for September will be processed for October statistics, but the full amount of the abnormal carry-over is not known. Sugar may also be among the commodities for which September statistics are undercounted.

EXPLANATION OF STATISTICS

COVERAGE. Import statistics include merchandise imported by government agencies as well as by private importers, but exclude American goods returned by the U.S. armed forces for their own use. U.S. trade with Puerto Rico and U.S. possessions is not included in this report but the import trade of Puerto Rico with foreign countries is included as a part of the U.S. import trade. Merchandise shipped in transit through the United States between foreign countries is not included in import statistics. However, the statistics may include some merchandise (principally duty free) which is entered through U.S. Customs and subsequently exported in the same condition in which imported. In many cases, such merchandise differs from intransit merchandise only in the manner in which it is documented.

VALUATION. The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the U.S. import duties, ocean freight and marine insurance.

RELIABILITY. Effective July 1965, monthly import statistics for individual commodities are based on full compilation of all shipments valued $251 and over (over 98 percent of the total import value) and are therefore free of sampling variability. They are, however subject to some error due to the omission of all formal and informal entry shipments valued under $251 from commodity statistics. Prior to July 1965, monthly import statistics for individual commodities were based on full compilation of all formal entry shipments valued $100 and over (over 99 percent of the total import value) and thus subject to some error due to the omission from commodity statistics of all informal entry shipments (i.e. those valued under $251) and under $100 formal entry shipments. The statistics in this report are also subject to some error from such sources as the carryover of data from month to month in the compiling process and errors in reporting or processing. Although the effect of such errors on the rounded totals in this report is probably small, the possibility of inaccuracy should be taken into account particularly in using figures of relatively small magnitude. The largest variation from rounding of figures is $50,000.

Further information regarding coverage, valuation, compilation procedures and precision of import data is contained in the foreword of Report FT 125. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.

For sale by the Bureau of the Census, Washington, D.C. 20233. Price 10¢ per copy.
Annual subscription (FT 900, 930, 950, 970, 975, 985, and 986 combined) $5.00.

U.S. GENERAL IMPORTS OF MERCHANDISE BY SELECTED SCHEDULE A COMMODITY GROUPINGS AND PRINCIPAL COMMODITIES
SEPTEMBER 1965 AND SELECTED PERIODS

(Quantity in units indicated; value in millions of dollars. General imports are commodities imported for immediate consumption plus entries into bonded warehouse. Imports for consumption are commodities imported for immediate consumption plus withdrawals for domestic consumption from bonded warehouses. Figures for 1965 are as originally issued and have not been revised to include published corrections. Figures for 1964 include all revisions published with December 1964 reports, or earlier, but do not include revisions published during 1965. Totals represent sum of unrounded figures, hence may vary slightly from sum of rounded amounts)

 U.S. GENERAL IMPORTS OF MERCHANDISE BY SELECTED SCHEDULE A COMMODITY GROUPINGS AND PRINCIPAL COMMODITIES
SEPTEMBER 1965 AND SELECTED PERIODS—Continued

Commodity description and unit of quantity[1]	1965			1964		
	September	August	Jan.-Sept.	September	August	Jan.-Sept.
Nonferrous metals - crude, blister, refined, mill shapes and scrap--Continued						
Aluminum and alloys.....value..	20.6	24.5	195.9	22.2	14.2	162.2
Nickel and alloys, including nickel oxide.....value..	14.9	15.1	144.6	10.0	16.4	116.9
Tin and alloys.....value..	17.2	9.5	110.7	9.0	14.3	84.7
Manganese and chromium ore and metal (excluding ferroalloyed forms)[4 5]....value..	7.9	7.8	64.4	4.9	3.0	47.1

*See footnote 2 on front page of this report.
- Represents zero.
Z Indicates less than $50,000.

[1]Based on the commodity classifications listed in Schedule A, Statistical Classification of Commodities Imported into the United States, as published in the special Census Bureau publication entitled "Changes in Presentation of U.S. Import Statistics Effective 1964." A "Supplement" to Report FT 930-I showing the coverage for the individual commodity totals in terms of the Schedule A classifications is available on request.

[2]Excludes, also, wool-like hair of other animals (see footnote 8) whether on or off the skin. Wool and wool-like animal hair on the skin are included under "Hides and skins, undressed, except fur skins;" cashmere goat-hair is included with "Fur skins, undressed." All unmanufactured wool and wool-like animal hair, whether on or off the skin, are combined in Part III of this table under the summary grouping "Wool unmanufactured (including on the skin)." See footnote 8.

[3]Consolidated in Part III of this table with similar commodities, dispersed among one or more other Schedule A commodity sections in Part III, and shown under appropriate descriptive headings.

[4]Includes ores of base-metals customarily used as ferroalloying materials: manganese, chromium, tungsten, titanium, molybdenum, vanadium, zirconium, etc.

[5]Includes base metals customarily used as ferroalloying materials but not yet processed into ferroalloys. (See footnote 4, above.)

[6]Parts and accessories for agricultural tractors are shown under "Transport equipment."

[7]Effective July 1965, represents estimated values for formal and informal import entries valued $250 or less. Prior to July 1965, represented estimated values for formal import entries valued at less than $100 and informal entries valued $250 or less.

[8]Includes carbonized wool and wool-like hair of other animals, on or off the skin—e.g. camels hair, alpaca, cashmere, vicuna, angora, etc.
